Customer onboarding guide

Your onboarding at a glance

Five stages from sign-up to your first text — who does what and when.

~20 days to live

From sign-up to your first text

The five stages

Stage	Timeline	What to prepare
Welcome & kickoff	**Day 0-3**	Attend with your points of contact, use case, user counts, and ideal live date.
Compliance & registration	**The gate**	Send us the checklist below. Ask us to review your opt-in form first.
Account setup	**In parallel**	Confirm your user list, numbers, and integrations (HubSpot, Aircall, RingCentral).
Training	**Before launch**	Book the admin and group sessions and get your team on them.
Go-live & support	**~Day 20+**	Start texting and bring anything you need to your Customer Success Manager.

Compliance is the gate

You can't send texts or calls until your business is carrier-approved (10DLC or Toll-Free). Getting us your details early and accurate is the single biggest way to go live faster.

Customer onboarding guide

Clear the compliance gate

Bring these to Stage 2 and you'll go live faster.

What to bring to Stage 2

Have these ready to clear the compliance gate fast.

Business name + EIN	Exactly as they appear on your IRS documents.
Business website	An active site with a Privacy Policy, SMS consent language, and Terms.
Opt-in method	How people agree to your texts: web form, paper, keyword, or QR code.
Use case + samples	What you'll send, plus real examples with your brand name.
Users and numbers	Who needs access and whether you're bringing existing numbers.
Integrations	The CRM and tools you want connected.

A rejection isn't a dead end

If carriers reject something, we tell you what to change and resubmit for you. Common causes: a name mismatch, a new EIN, or a bundled opt-in form.

Quick answers

Not sure which stage you're in?

Ask your Onboarding Manager or CSM — they can tell you your stage and what's outstanding.

Want your opt-in form checked first?

Send it over before you submit. A two-minute review can save days.

What integrations are supported?

HubSpot, Aircall, RingCentral and other CRM and calling tools — confirm yours at kickoff.
