SMS Opt-In Compliance

Collect SMS opt-in the right way

What a compliant opt-in looks like, with a real example and a simple checklist.

A phone number alone is not consent

Carriers require explicit, checkbox-based opt-in

Every opt-in must include

Use the Brightside Pest Control form as a model. Every item below is a carrier requirement for your signup page.

Phone number field	Clearly labeled and optional to fill in
Unchecked checkbox	Person actively checks it; never pre-checked
Business name	Exact registered name in the opt-in language
Message description	What texts they will receive (reminders, offers)
Standard disclosures	Msg & data rates, frequency varies, STOP, HELP
Terms & Privacy	Separate checkbox with links to both policies

Split consent by message type

One checkbox for all SMS is the #1 rejection reason. Transactional, marketing, and Terms each need their own unchecked box.

SMS Opt-In Compliance

Make your form pass review

Privacy language, sample messages, and the disclosures carriers check.

Three separate checkboxes

Each message type needs its own unchecked checkbox, plus a separate Terms acknowledgment.

Transactional SMS	Appointment and account texts with frequency and rate disclosures
Marketing SMS	Offers and promotions; consent is not a condition of purchase
Terms & Privacy	Accept Terms of Service and Privacy Policy, with links

Privacy Policy that passes review

State it plainly. Your Privacy Policy must say you do not sell or share mobile numbers, SMS consent, or message data with third parties for marketing. Share only with service providers to operate your SMS program.

Include disclosures. "Message frequency may vary. Msg & data rates may apply. Reply STOP to opt out; HELP for help."

Sample messages matter

Too vague: "Hi, check out our updates." Generic placeholders like this get rejected by carriers.

Compliant: "Brightside Pest Control: Hi Jane, your appointment is confirmed for Tue 3/12. Reply STOP to opt out or HELP for assistance."

SMS Opt-In Compliance

Review before you submit

Common mistakes to avoid and a checklist to clear carrier review.

What gets a form rejected

Avoid these and you will clear review the first time around.

Combined checkbox	One box covering all SMS types fails review
Pre-checked or missing	Consent must be actively checked, never defaulted
Consent on submit	Form submission alone is not valid opt-in
Missing elements	No STOP, HELP, brand name, or rate disclosures

Pre-submission checklist

Run through this before you submit.

Business name	Matches registration, website, and sample messages
Phone field	Dedicated, optional number field on the form
Consent checkboxes	Separate, unchecked, one per message type
Terms & disclosures	Own checkbox with links; rates, STOP, HELP nearby
Sample messages	Brand name, realistic content, and opt-out language

Need a hand?

Your Salesmsg team is happy to review your opt-in form before you submit. A two-minute check can save days of back-and-forth.
