01 / ONBOARDING AT A GLANCE

From sign-up to your first text

Five stages, about 20 days, and one carrier-approval gate to plan around.

Sign-up to live ~20 days

Typical timeline; carrier approval can take longer.

No texting until carriers approve you

You can't send texts or calls until your business is registered and carrier-approved (10DLC or Toll-Free). We prepare and submit it; carriers decide, usually within several business days, occasionally longer.

The five stages

STAGE	WHEN	DONE WHEN
1. Welcome & kickoff	Day 0–3	You have your onboarding plan and timeline in writing.
2. Compliance & registration	The gate	Your Brand and Campaign are carrier-approved and sending is unlocked.
3. Account setup	In parallel	Numbers, users and integrations are live and a test message sends.
4. Training	Before launch	Admins and users are trained and have the recording and recap.
5. Go-live & support	~Day 20+	You're live, measured and on a regular check-in cadence.

Start with Stage 2. Getting us your business details early and accurate is the single biggest way to go live faster. Account setup runs in parallel.

02 / ONBOARDING AT A GLANCE

Who does what at each stage

Here's what Salesmessage handles and what we need from you to keep moving.

What we do

Welcome & kickoff	Match you with an Onboarding Manager (and a CSM, by plan) and run your kickoff call.
Compliance & registration	Prepare, submit and manage your carrier registration; fix and resubmit anything that comes back.
Account setup	Set up numbers, inboxes, users, assignment rules, business hours and permissions; connect your CRM.
Training	Run a 1:1 admin session and a group session for your users.
Go-live & support	Check in on go-live morning, then follow up about two weeks later on blockers and KPIs.

What you do

Welcome & kickoff	Bring your contacts, use case, user and number counts, tools to connect and live date.
Compliance & registration	Send us the Stage 2 checklist; ask us to review your opt-in form before you submit.
Account setup	Confirm your users, numbers and integrations, such as HubSpot, Aircall or RingCentral.
Training	Book the sessions and get your team on them.
Go-live & support	Start texting, and bring anything you need to your Customer Success Manager.

> **Which registration you need**
>
> 10DLC covers local numbers. Toll-Free Verification covers toll-free numbers and all Canadian numbers. Numbers can be new, transferred, ported or hosted.

03 / ONBOARDING AT A GLANCE

Stage 2: the compliance gate

Bring these to Stage 2 and you'll clear the gate fast.

Your Stage 2 checklist

Legal name + EIN	Your legal business name and EIN / Tax ID, exactly as on your IRS documents.
Business website	An active site with a Privacy Policy (including SMS consent language) and Terms.
Opt-in method	A link or screenshot of how people agree to texts: web form, paper, keyword or QR.
Use case + samples	What you'll send, plus a couple of real example messages with your brand name.
Users and numbers	Who needs access, and whether you're bringing existing numbers.
Integrations	The CRM and tools you want connected.

> **A rejection isn't a dead end**
>
> If the carriers send something back, we tell you exactly what to change and resubmit it for you.

Quick answers

Why do registrations get rejected?

A legal name that doesn't match IRS records, a new EIN still propagating (30–90 days), or one opt-in checkbox for all message types.

Should I get my opt-in form checked?

If it isn't built yet, ask us to review it before you submit — that's the #1 cause of rejections.

Not sure which stage you're in?

Ask your Onboarding Manager or CSM. They can tell you your stage and what's outstanding.

What does training cover?

1:1 texting, broadcasts, tags, contacts, calling, your CRM integration and SMS best practices. Weekly webinars and the Help Center stay open after.
