01 / YOUR FIRST DAY

Your first day on Salesmsg

Five steps from your invite to your first real conversation.

Five steps **about 20 minutes**

Your organization is already approved with the carriers.

Steps 1-3: get yourself set up

1. Accept your invite. Open the invitation email from Salesmsg, click the link and set your password. Done when you're logged in and can see your company's workspace and your inbox.

2. Get your contacts in. Add one contact by hand, or import your list. You can't text anyone until someone's in here. Done when at least one person you plan to text is in your contacts.

3. Send your first text. Pick a contact, write something real rather than a test, and send. Done when your message shows as delivered.

Texts cost credits

About one credit per 160 characters, unless the message uses special characters.

Plain text

160

characters = 1 credit

One emoji or a curly quote

70

characters = 1 credit

Doubles the cost of the message.

A curly quote pasted in from Word is enough to trigger it.

> **Make sure they opted in**
>
> A phone number in your CRM isn't permission to text. Only message people who agreed to hear from you.

02 / YOUR FIRST DAY

Make it real, then fix what breaks

The last two steps, plus the things that usually go wrong.

Steps 4-5: prove it works

4. Get a reply and respond. Ask a colleague to text your Salesmsg number, then reply from your inbox. This is the real test: it proves messages reach you as well as leave you.

5. Set up wherever you work. Install the mobile app so you're reachable away from your desk, and the Chrome extension if you text from your browser. Done when you see the same conversations everywhere.

> **Working in HubSpot?**
>
> Add the Salesmsg App Card in your HubSpot settings; it won't appear on contact records until you do. Then check your HubSpot user is mapped to your Salesmsg user, because unmapped users can't send.

If something doesn't work

Message didn't deliver	Usually the number or the content. Send your admin the contact and the time.
No inbound notification	Check your notification settings, then your phone's. Still nothing, tell your admin which inbox.
No App Card in HubSpot	Add it yourself in HubSpot settings. If it's there but won't send, you're not mapped.
HubSpot contacts missing	They come across as they're used. Ask your admin for a bulk import.

Still stuck?

Ask your admin first. Most of this they can fix in a minute. For anything else the Help Center is at help.salesmessage.com, or email support@salesmessage.com.
