Your first day on Salesmessage

Five steps take you from your invite to your first real conversation in about 20 minutes. Your organization is already registered and approved with the carriers, so everything here is just your own setup.

1. Accept your invite

Open the invitation email from Salesmessage, click the link, and set your password.

Done when	You're logged in and can see your workspace and inbox.

2. Get your contacts in

Add one contact by hand, or import your list. You can't text anyone until someone's in here. This is the step people most often skip and then get stuck on.

- Working in HubSpot? Contacts arrive as they're used, not all at once.
- They come across when searched for, opened in the panel, or run through a workflow.
- Need your list brought over in bulk? Ask your admin.

Done when	At least one person you plan to text is in your contacts.

3. Send your first text

Pick a contact, write something real rather than a test, and send.

Done when	Your message shows as delivered.

4. Get a reply and respond

Ask a colleague to text your Salesmessage number, then reply from your inbox. This is the real test: it proves messages reach you as well as leave you.

Done when	You received an inbound message, got notified, and replied.

At a glance

TAKES ABOUT
20 minutes

STEPS
5

CARRIER APPROVAL
Already done for your organization

STANDARD TEXT
About 1 credit per 160 characters

EMOJI OR CURLY QUOTE
70 characters per credit

Make sure they opted in

A phone number in your CRM isn't permission to text. Only message people who agreed to hear from you.

5. Set up wherever you work

Install the mobile app so you're reachable away from your desk, and the Chrome extension if you text from your browser.

Done when	You see the same conversations everywhere you work.

Working in HubSpot?

Two things only you can do in your own HubSpot account:

App Card	Add it in your HubSpot settings. It won't appear on contact records until you do.
User mapping	Check that your HubSpot user is mapped to your Salesmessage user.
Unmapped users	Can't send. Your admin can map you.

If something doesn't work

Quick checks before you ask for help:

Message didn't deliver	Usually the number or content. Send your admin the contact and time.
No inbound notification	Check your notification settings, then your phone's. Still nothing? Tell your admin.
No App Card in HubSpot	Add it yourself in HubSpot settings. There but won't send? You're not mapped.

Texts cost credits

A single emoji or a curly quote pasted from Word drops a credit from 160 characters to 70 and doubles the cost.

Stuck on any of this?

Ask your account admin first; most of it they can fix in a minute.
